1st TRIMESTER COMMENTS

Mr. O

Student seems to truly enjoy social studies and science and has made significant positive contributions to class lessons and discussions. Student has demonstrated a true understanding of the content material. Independent activities, keeping track of materials, and working with technology have not impeded Student from working up to expectations. I would like to see Student continue to demonstrate positive leadership qualities in the classroom.

Mr. G

Is a pleasure to have in class.
Always does his/her best in class.

Mr. °

Is a pleasure to have in class.
Consistently creates high quality work and shows artistic talent.
Outstanding effort!

Ms. U

Student has great recall of her multiplication and division facts. In math class, she turns in her work in a timely fashion, is hard working, and is not afraid to ask for assistance as appropriate. She does a great job comprehending existing word problems. I do encourage her to continue practicing writing her own mathematical expressions.

Ms. -O

Student is reading with nice fluency and expression and is self-correcting many of her own errors. She demonstrates an understanding of what she reads and is working hard to locate textual evidence to support her thinking. In her writing, Student is incorporating strong topic sentences, sensory details, and has learned to edit and revise her own work. She should be commended for her strong work ethic and the positive attitude she brings to ELA each and every day!

Ms. U

Does very well in class.
Is a pleasure to have in class.
